## **DETAILED ACTION**

### ***Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

**Note that part (a) and part (f) are not shown in the specification. Appropriate corrections are required.**

***Claim Objections***

Claims 1, 9, 11, 13, 14, 16 and 19 are objected to because of the following informalities: In claims 9 and 19, line 2, respectively, change "helmets" to --helmet--. In claims 13 and 14, line 1, respectively, change "helmet" to --method--. In claim 16, line 1, change "2" to --12--. In claims 1 and 11, line 8 and line 9, respectively, change "the" before "load voltage constant" to --a--. Appropriate correction is required.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11-20 are rejected under 35 U.S.C. 101 because the set of claims is intended to embrace both product and process, and therefore violates the language of 35 USC 101 which sets forth statutory classes of invention in alternative only.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-20 are rejected under 35 U.S.C. 112, second paragraph because the set of claims is also invalid under 35 U.S.C. 112, second paragraph, since claim which purports to be both product and process is ambiguous and therefore does not particularly point out and distinctly claim subject matter of the invention. See *Ex parte Lyell*, 17 USPQ2d 1548.

***Allowable Subject Matter***

Claims 1-10 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose a protective helmet including a circuit which has a comparator receiving an input voltage and a reference voltage from at least one battery; said comparator being turned ON when the input voltage exceeds the reference voltage, and a semiconductor device actuated by the comparator and functioning as a shunt to maintain a load voltage constant for voltage/current variations as the battery is worn down (claim 1) .

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
